#### **911 Community Isolation, Rio Linda, Sacramento County**

On 11/08/17 at 1405 hours, the Cal OES 9-1-1 Branch advised the California State Warning Center (CSWC) that AT&T is currently experiencing a central office failure in Rio Linda, Sacramento County. The outage is preventing residents from dialing 9-1-1.

- Sacramento County Sheriff's Office is the primary affected Public Safety Answering Point (PSAP). Placer County Sheriff's Office, Sacramento Police Department, and Sutter County Sheriff's Office also have a small number of residents affected.
- The PSAP is unaffected. They are taking calls as normal and have been notified of the isolation.
- 4,717 landlines are unable to dial 9-1-1.
- Wireless 9-1-1 calls have not been impacted.
- Time of restoration is unknown.
- Cal OES 9-1-1 Branch will continue to monitor and provide updates as they are received.

# WEATHER OF CONCERN

## Weather of Concern

- There is no weather of concern.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# Key Points

11/8 – 11/15

## Thursday-Friday

- Light valley rain and moderate mountain precipitation will continue. Leaf-clogged drains could result in ponding of water on roadways and minor street flooding in neighborhoods.
- Snow levels will remain high, above most pass levels, but there could still be impacts to travel as roads will be wet and slippery.
- Winds will be strong and gusty at times, as high as 60 mph over highest elevations. Strong winds could down trees and powerlines with prolonged power outages.

## Saturday

- Short break in weather system expected with no new impacts anticipated at this time.

## Sunday-Tuesday

- Another round of valley rain and high elevation snow possible.
- This system is expected to be equal to the one currently starting to impact the State.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

\*\*\* Wetting precipitation the next few days \*\*\*

\*\*\* Gusty southerly winds today and Thursday \*\*\*

A moist southwest flow weather pattern has begun across the region. Cloud cover will be abundant with high humidity values during the next 3 days. Wetting precipitation in the form of rain and higher elevation snow will be included in this unsettled weather pattern. Amounts up to 3.0 inches will be possible across the North Coast and Northern Sierra. Liquid water amounts greater than 0.10 inches are expected across the majority of the area through Friday. Snow accumulation levels will generally be above 7000 feet during this event period. Gusty southerly winds will also impact portions of the area. Gusts between 30 to 40 mph with locally up to 55 mph along the Northern Sierra is expected today and Thursday. Drier weather Saturday before a return to unsettled weather Sunday and lasting well into next week. Another round of wetting precipitation is expected then. Not expecting any extended dry or warm periods during the next 7 days although southern areas, especially near the Bay area, will benefit least from the precipitation. Confidence is pretty high for that result.

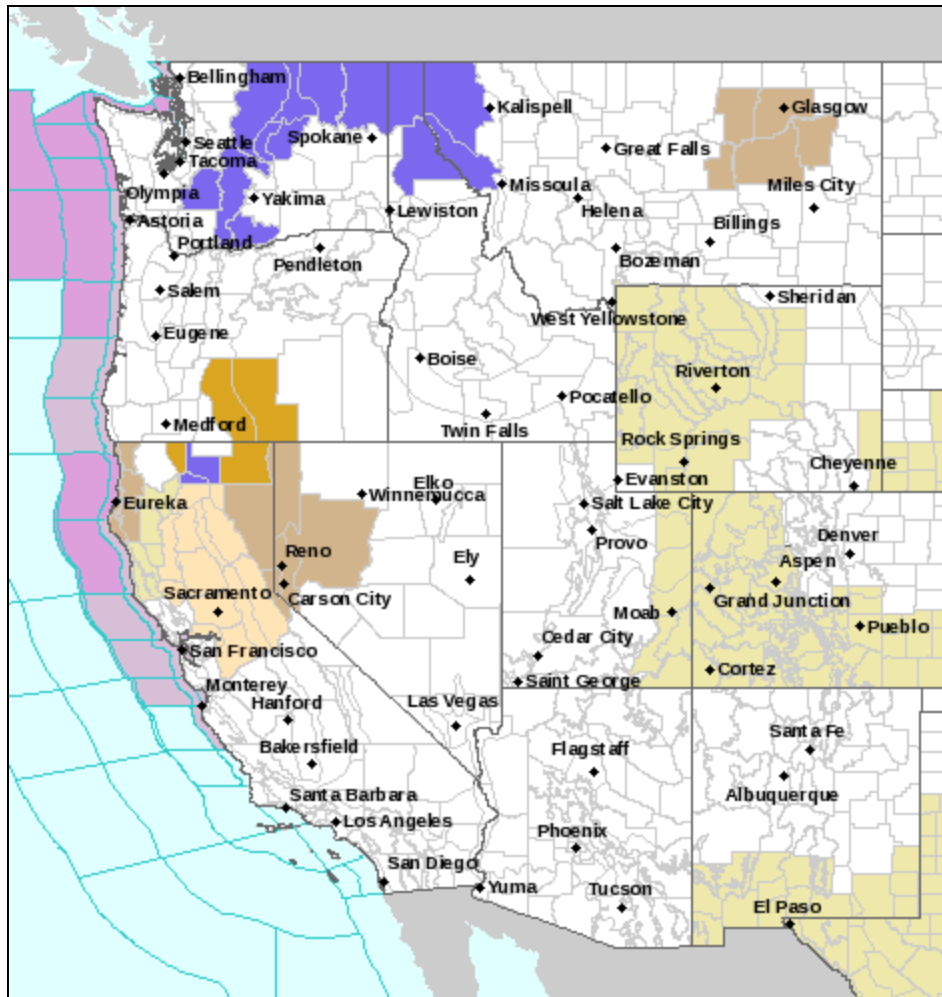

## **SOUTHERN CALIFORNIA**

Two storm systems will impact the state over the next 5 days, bringing widespread precipitation to the northern half of the state along with breezy conditions in the desert. The first of these storms will begin to produce precipitation along the central coast toward evening with rain and snow reaching the Sierras north of Fresno County overnight. Like the past few storms, most of the precipitation will remain north of the district, but a quarter to a half inch of rain will be possible in Monterey County and in the Sierras north of Yosemite National Park tonight into Thursday morning. West winds will increase to 20-30 mph Thursday afternoon from the Antelope Valley eastward into the central Mojave Desert. Temperatures today through Friday will be a couple degrees below normal with readings in the 50s in the mountains to the 60s at the coast with 70s common in the valleys. Saturday, a weak ridge will build over the area, leading to light winds and warmer temperatures. Some valley locations will be close to 80 Saturday, but temperatures Sunday will likely drop a couple degrees in advance of the next storm which is expected to arrive Monday. This storm will follow a similar path with any resultant precipitation mainly remaining north of the district. It will turn windy in the desert again Monday and Tuesday afternoon. Some gusty north winds will be possible both Monday and Tuesday night in Santa Barbara County and the I-5 Corridor. No excessively hot or dry weather, nor any northeasterly offshore wind, is expected during the next 10 days.
